

Portable MIDI Sequencer — Alpha 1

Cheat Sheet (EN / RU)

Buttons (physical labels)

Buttons are numbered internally 0–7, but labeled here as **1–8** for the user.

Button mapping

#	Label (User)	Function
1	PLAY / STOP	Start / stop playback
2	PAUSE	Pause playback
3	REC	Record / overdub
4	REW	Reserved (future rewind / scrub)
5	FF	Reserved (future fast-forward / scrub)
6	—	Reserved
7	—	Reserved
8	SHIFT / TAP	Shift modifier / Tap Tempo

Encoder

- Rotate:
 - Select **track**
 - Edit **BPM**, **loop length**, **project number** (depending on mode)
 - Press (if applicable): confirm / enter edit mode
-

Transport & Recording

PLAY / STOP

- Toggle playback
- Works in both **Linear** and **Loop** modes

PAUSE

- Temporarily pauses playback

REC behavior

- **Linear mode**
 - REC during recording → **destructive** (re-records track)
 - **Loop mode**
 - REC during recording → **overdub** (default)
 - **REC pressed during active recording**
 - immediately **cleans current track**
-

Special combinations

- **REC + PLAY**: start recording from stop
- **REW + FF during recording**: MIDI panic (All Notes Off)

(Long presses are NOT used in Alpha 1 — reserved for future features)

Tap Tempo

- Available **only when stopped**
 - Available **only in BPM edit mode**
 - Activated via **Button 8 (SHIFT / TAP)**
-

Visual indicators

- * (asterisk) on screen
 - indicates **edit state** (parameter is being edited)
 - LEDs
 - show transport state, activity, and feedback
-

Modes

Linear Mode

- Timeline-based recording
- REC = destructive while recording

Loop Mode

- Fixed loop length
 - REC = overdub by default
-

Projects

- 10 user projects (1–10)
 - Save / Load / Clean per project
 - Last project auto-loaded on boot
-

MIDI

- MIDI TRS IN / OUT
 - 16 tracks = 16 MIDI channels
 - Designed to control up to **16 external instruments** (via MIDI router)
-

Planned (not in Alpha 1)

- Rewind / Fast-forward (scrub)
- Solo / Mute per track
- MIDI Clock In / Out
- Full MIDI CC control of device
