

Future Features & Roadmap — Alpha 1

Future Features & Roadmap — Alpha 1

Planned Features

MIDI Clock Synchronization

- MIDI Clock In / Out (planned)
- Ability to act as master or slave in synchronized setups
- Integration with drum machines, sequencers, and DAWs

Track Control Enhancements

- Solo per track (planned)
- Mute per track (planned)

Scrub Mode

- Timeline scrubbing for precise navigation
- Non-destructive auditioning of recorded material

MIDI CC Control

- Extensive control of core device functions via MIDI CC
- External controllers and sequencers can manipulate the device
- Exact CC map to be finalized during development

Display & UI Expansion

- Planned parallel hardware version with 2.4" SSD1309 display
- Same core firmware philosophy, extended visual feedback

Development Philosophy

Alpha 1 focuses on validating:

- Core sequencing workflow in real musical use
- Reliability of save/load mechanisms
- Practical user feedback to guide future architectural decisions
