

Portable MIDI Sequencer — Alpha 1

Portable MIDI Sequencer — Alpha 1

One-page Product Brief

What It Is

A budget-friendly, standalone hardware MIDI sequencer designed for live MIDI recording and dawless music creation.

Core Capabilities

- Live MIDI performance recording
- 16 tracks / 16 MIDI channels
- Multi-instrument control via MIDI routing
- Reliable save/load system
- Internal clock (MIDI Clock In/Out planned)

Design Intent

Designed as a centerpiece for dawless setups during Alpha 1, with future updates expanding synchronization and control capabilities.

Target Users

- Hardware-focused musicians
- Dawless performers
- Keyboard and pad players

Price Positioning

- Target range: \$100–150 USD
- Lower cost at higher production volumes
- Higher cost for limited or manual assembly runs

Future Expansion

- MIDI Clock synchronization
- MIDI CC control of core features
- Advanced track controls
- Enhanced display options
