

Portable MIDI Sequencer — Public Alpha 1

Documentation Links

- Project Overview (EN / RU)
- Future Features & Roadmap
- Feature Comparison & Market Positioning

This one-page brief summarizes the project and points to the full documentation set for deeper technical and musical context.

What It Is

A budget-friendly standalone MIDI sequencer designed for **live MIDI performance recording**, multi-track sequencing, and reliable project-based workflow — without requiring a computer. Designed as a **centerpiece of a dawless setup** in its Alpha stage.

Key Capabilities

- Live MIDI recording (linear + loop modes)
- 16 tracks / 16 MIDI channels
- Multi-device routing via MIDI router
- Project save/load/clean (flash-based, robust)
- Minimal screen gazing workflow
- Encoder + 8 buttons + 8 LEDs
- 0.96" OLED display
- MIDI TRS In / Out (DIN via adapter)

Alpha 1 Focus

- Practical evaluation of the core sequencing workflow
- Collecting focused user feedback to guide future architectural and workflow decisions

Roadmap Highlights (Planned)

- MIDI Clock In / Out
- Track mute / solo
- Scrub mode
- Full MIDI CC control of device functions
- Larger display variant (2.4" SSD1309)

Target Audience

Musicians comfortable with live playing on MIDI keyboards or pads, seeking a **hands-on hardware sequencer** rather than grid-based programming.
